INTERACTIVE LIVE VITUAL PROGRAM

May 24-26, 2024

At the end of this course, participants will be able to:

- Assess their knowledge across the spectrum of identified topics in obstetrics and gynecology;
- Identify areas of strengths and weaknesses by utilizing touch pad technology.

Friday, May 24, 2024

Cervical and Vulvar Cancer

Dr. Joannie Neveu

- Identify common vulvar pathologies and know how to treat them
- Review how do perform vulvar biopsies and when to do them

Vulvar Disease and Colposcopy

Dr. Robert Kennedy

- Identify strategies for integrating colposcopy into clinical practice for comprehensive evaluation and management of vulvar disease.

Urogynecology

Dr. Kristin Wadsworth

- Recognize the pathophysiology, investigation, diagnosis, and/or management of urogynecology conditions

Infertility

Dr. Alannah Smith

- Identify the basic building blocks of steroid hormones
- Review steroidogenesis pathway

Endometriosis, Chronic Pelvic Pain and Abnormal Uterine Bleeding

Dr. Olga Bougie

- Recognize the symptoms and risk factors associated with endometriosis, chronic pelvic pain, and abnormal uterine bleeding

Gestational Hypertension and Fetal Growth Restriction

Dr. Harrison Banner

- Review classification of hypertensive disorders of pregnancy
- Recognize pre-eclampsia with respect to prediction, prevention and prognosis
- Develop an approach to the management of fetal growth restriction

Infections in Pregnancy

Dr. Jeffrey Wong

- Identify characteristics, epidemiology and pathogenicity of common infectious agents and conditions
- Discuss the treatment regimens in use, based on current evidence

Gynecologic Infections

Dr. Jeffrey Wong

- Discuss common gynecological infections and review current treatment regimens
- Test your knowledge by answering exam questions regarding hormones/steroid pathway/functions

Saturday, May 25, 2024

Uterine Cancer

Dr. Samantha Dubé

- Discuss the precursors, histology and management of epithelial and stromal tumors

Ovarian Cancer

Dr. Vishaal Gupta

- Discuss the etiology, prevalence, screening and management programmes, based on current evidence, for the primary management of ovarian cancer

Prenatal Diagnosis (Screening, Preconception Counseling, Teratology)

Dr. Kirsten Niles

- Summarize an overview and approach for prenatal screening, preconception counseling, diagnostic testing for aneuploidy and teratology

Medical Complications in Pregnancy (Part 1)

Dr. Jillian Coolen

- Review normal maternal physiologic adaptations to pregnancy.
- Examine maternal medical complications of pregnancy and their management (respiratory, neurologic, gastrointestinal, diabetes, parathyroid, rheumatologic and critical care)

Medical Complications in Pregnancy (Part 2)

Dr. Jennifer Hunt

- Review normal maternal physiologic adaptations to pregnancy
- Examine maternal medical complications of pregnancy and their management (cardiovascular, renal, hematologic, dermatologic, thyroid and malignancies)

Too Early or Too Late: Precocious Puberty and Primary Amenorrhea

Dr. Maria Kielly

- List aspects of precocious puberty and delayed puberty/primary amenorrhea with respect to normal pubertal milestones, differential diagnosis, investigation and management Issues

Steroid Biosynthesis Function, Anovulation, PCOS and Hirsutism

Dr. Jason Elliott

- Describe the prevalence and list the main causes of infertility.
- Develop an approach to help infertile couples

Multiple Pregnancy

Dr. Sheryl Choo

- Review of factors that influence twinning
- Recite the complications of diagnosing and treating abnormalities of multiple pregnancies and to list the different safe options in managing labor in a multiple gestation

Sunday, May 26, 2024

Menopause and Hormone Therapy

Dr. Michelle Jacobson

- List and describe the different types of HRT
- Identify and discuss evidence-based guidelines related to menopause and HRT

Contraception

Dr. Ashley Waddington

- Review effectiveness, indications/contraindications, side effects and non-contraceptive benefits of combined hormonal contraceptives, emergency and intrauterine contraception

Gestational Trophoblastic Neoplasia

Dr. Lua Eiriksson

- Recognize and diagnose GTD
- Name different classifications of malignant GTD (GTN)
- Assess low and high risk GTN patients

Gender Inclusive Obstetrics & Gynecology Care and Medicolegal Considerations

Dr. Fiona Mattatall

- Recognize health issues experienced by transgender/gender diverse Canadians
- Using WPATH guidelines, understand gender-affirming hormone therapy.
- Review current gender-affirming surgeries
- Understand common Ob/Gyn concerns for transgender/gender diverse patients
- Consider how to use a trauma-informed approach and a shared consent model of care

HPV Screening for Cervical Cancer

Dr. Karla Willows

- Review the burden of HPV and its impact on the healthcare system, particularly cervical cancer
- Review the landscape of HPV testing in Canada
- Compare and contrast HPV screening with traditional Pap test in terms of sensitivity/predictive value/cost/infrastructure needs, with special mention for self-swabbing for HPV
- Provide up-to-date information on how screening recommendations in special population via HPV (immunocompromised, vaccinated vs. unvaccinated)

Maternal Respiratory Syncytial Virus (RSV)

Immunization

Dr. Jeffrey Wong

- Review the burden of RSV and its impact on the general population with a focus on newborn health
- Outline (inter)national recommendations on RSV vaccinations in pregnancy
- Develop an approach to counselling patients regarding RSV vaccinations in pregnancy
